

## SCANIA TANZANIA LTD - RELIABLE WORKSHOP SERVICES

### WHY COME TO US?

By using an authorised workshop, you save time and money. Our technicians are trained to master all aspects of your Scania (other brands are also welcome). They have got Scania special tools and modern workshop equipment. Furthermore, our workshop manuals contain the latest information about parts and proper repair methods.

### SERVICES OFFERED:

1. Repair, service and maintenance of trucks and buses by our trained and certified workshop staff. Ask us about our standardised Scania Maintenance Programs.

2. We have got one of the most modern fuel pump test benches in Tanzania; fully computerised and 100% calibrated. This is to get the best performance and fuel consumption from your vehicle.

3. One of our specialties is the repair of units like gearboxes, engines and axles. We have the special tools needed to do the job right.

4. Is your chassis frame bent? We have got the country's only frame alignment facility for heavy commercial vehicles. We have the knowledge to make your "banana frame" straight again.

5. We do chassis extensions, where your tractor unit is turned into a rigid truck, suitable for e.g. box bodies or fuel tank bodies. An extra tag axle is also fitted, if necessary.

6. Test your brakes! Whenever a vehicle is involved in an accident, there are not only human lives wasted, but also a serious loss of capital for the truck or bus operator. At Scania we have the solution.

7. Every time you align your axles and wheels with our laser wheel alignment equipment, you will lower your costs for tyres and fuel. One of our customers did it and the calculation shows a reduction of costs for one year of 9,000,000,00 Shillings. And that is only for fuel....
